

Wightman Road Bridge closure work Briefing update no. 5 22nd April 2016

- A second drop in information session was held by Network Rail at St Paul's church on Wightman Road on Wednesday 20th April.
- Network Rail's contractors have begun placing additional clearer signage at key locations.
- An initial meeting has been held with business representatives to discuss impact of the road closures and determine what supporting actions can be taken.
- Engagement work with schools in the affected areas is continuing.
- National Grid Gas have begun gas main replacement works on Wightman Road between Pemberton Road and Fairfax Road. These works are due to complete by mid July and are being undertaken now to take advantage of the reduced traffic volume on Wightman Road and avoid an additional period of disruption once the bridge replacement works are completed.
