Celebrate our multicultural diversity to counter the rising tide of racism

On 23rd April 1977, the fascist National Front marched in Wood Green to spread their racist message. Thousands of us stood up to racism and opposed the march. A mass movement against racism defeated the NF.

Now we face Trump in the White House, growing Islamophobia across Europe and the UK, and desperate refugees drowning in the Mediterranean Sea. Three million of our neighbours and friends – EU migrants – are being used as bargaining chips in Brexit negotiations.

We need a new movement to defeat racism again
